🌐 [Website](#) 🐙 [GitHub](#) 🔗 [LinkedIn](#)

Senior fullstack engineer with 5+ years across HealthTech and Media, mainly with TypeScript, Next.js, and Python.

Experience

Bauer Media Group

Senior Fullstack Engineer

📅 May 2025 – present

📍 Hybrid in London, United Kingdom

- Scale web and CMS systems to +20 million monthly accesses.
- Develop Amazon Alexa Radio Skills Kit functionality using AWS Lambda, DynamoDB, and CloudWatch.
- Enforce end-to-end test coverage across multiple services and speed up CI/CD pipelines using Playwright.

RIVIAM Digital Care

Senior Fullstack Engineer

📅 Nov 2024 – Apr 2025 (6 months)

📍 Hybrid in Bath, United Kingdom

- Maintained critical HealthTech microservices built on Python, AWS Lambda, and RabbitMQ.
- Integrated and debugged live NHS and third-party health institution endpoints across UK.
- Delivered cross-platform client applications using Next.js, React, React Native, and Electron.

Always August

Fullstack Engineer

📅 May 2024 – Nov 2024 (6-month contract)

📍 Remote for Canada

- Built a community platform from 0 to 1 using React, Next.js, and TypeScript.
- Shipped CI/CD pipelines via GitHub Actions, deploying frontend to Vercel and backend to Netlify.
- Enforced end-to-end type safety across various API layers using Zod and TypeScript.

HostGator

Frontend Engineer

📅 May 2021 – June 2023 (~ 2 years)

📍 Remote for Brazil

- Developed e-commerce features across web, cart, and checkout flows using React, Next.js, and TypeScript.
- Sustained 96% test coverage across the codebase with Datadog, Jest, and React Testing Library.
- Contributed to Agile delivery through Sprints, Planning, Retro, and Refinement ceremonies.

ASSERT Tecnologia

Junior Data Analyst

📅 February 2019 – August 2020 (~ 1.5 years)

📍 In-person in Florianopolis, Brazil

- Implemented an automatic dialler which increased SDR call rates by 8x.
- Automated reporting dashboards in Microsoft Excel, accelerating data-driven decision-making.
- Processed and visualised datasets using Python, Pandas, Matplotlib, and Seaborn.

Projects

Minigame to Learn TailwindCSS — *Next.js, TypeScript, TailwindCSS, Vercel*

April 2024

- Launched css2wind.com, an interactive learning tool attracting +200 monthly active users.
- Enriched the platform with Resources, FAQ, and Tutorial pages to support learners at every level.
- Maintained an open-source repository, reviewing community pull requests and fostering collaboration.

Anti-Procrastination To-do List — *React, TypeScript, Vite, TailwindCSS*

February 2023

- Launched phived.com, a productivity tool used by +1,000 people monthly to combat procrastination.
- Implemented a local-first architecture using browser storage for instant load times and full data privacy.
- Grew the project through open-source community contributions and collaborative development.

Education

Santa Catarina Federal University (UFSC)

Bachelor of Science in Economics

📅 March 2018 – March 2021 (~ 3 years)

📍 Florianopolis, Brazil
